

Bablu Verma

Full Stack Developer (Node | React | DevOps)

Noida, India | +91 9217205979 | jbabluverma@gmail.com | GitHub | Portfolio | LinkedIn

Professional Summary

Full Stack Developer with 4 + years of experience building scalable web and mobile applications. Proficient in React, Next.js, Node.js, and React Native with a strong focus on backend performance, database optimization, and seamless user experiences. Experienced in leading feature development, implementing secure authentication systems, and mentoring junior developers. Committed to writing clean, maintainable code and delivering high-impact solutions in fast-paced environments.

Work Experience

Fullstack Developer (Team Lead) | 4tuners Technologies | Greater Noida | Jul 2025 – Mar 2026

- Built a Node.js backend that handles 300+ concurrent requests with response times consistently under 100ms.
- Worked on an offline-first POS system using background sync - the kind of thing where if the internet drops mid-billing, nothing breaks. Added conflict resolution for when devices come back online.
- Cut Largest Contentful Paint by 50% by going after image sizes, font loading, and critical CSS the boring way that actually works.
- Put together a 4-tier RBAC system with proper permission granularity and audit logs for traceability.
- Rewrote some nasty PostgreSQL queries and got them from 450ms down to 120ms — mostly indexing and connection pooling.
- Work across 3 production apps and trimmed bundle size by 32% with proper code splitting and tree shaking.
- Mentored 4 junior devs and ran 20+ code reviews every week to keep quality from drifting.

React & React Native Developer | Freekaamaal.com | Noida | Sep 2022 – May 2025

- Built and shipped a React Native app on both stores — crossed 20K downloads with a 4.2 rating.
- Set up SSR on 50+ deal pages using Next.js, which pushed organic traffic up 55% in three months.
- Wired up real-time deal tracking with Socket.io + React Query, which bumped engagement by 35%.
- Improved Time-to-Interactive by 44% through route-based code splitting and dynamic imports.
- Got Firebase Cloud Messaging working at 92% delivery rate for price drop alerts.
- Drove React Native architecture and mobile best practices that the team still uses.
- Redesigned MongoDB schemas with compound indexes and dropped query time from 800ms to 80ms (94% improvement).

Web Developer | Qwerty Code | Noida | Oct 2021 – Aug 2022

- Built RESTful APIs in Express.js + MongoDB that handled 1K+ requests per minute.
- Implemented JWT auth with refresh token rotation — no more token reuse issues.
- Cleaned up MongoDB aggregation pipelines and made them 73% faster through restructuring and better indexes.
- Got bundle size down 28% using dynamic imports and tree-shaking.
- Built a centralized middleware pipeline for logging, validation, and errors — cut production bugs by around 35%.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, React Query, Tailwind CSS, Material UI, HTML5, CSS3

Mobile: React Native, Expo, AsyncStorage, Push Notifications (FCM),

Backend: Node.js, Express.js, REST APIs, GraphQL, Socket.io, Python, Webhooks.

Database: PostgreSQL, MongoDB, Redis, Prisma ORM, Mongoose, Query Optimization

DevOps & Tools: Docker, Git, GitHub Actions, CI/CD, Vercel, Nginx, PM2, AWS, Postman, Jest.

Core Concepts: SSR/SSG, JWT/OAuth, RBAC, Caching Strategies, Web Performance, Agile/Scrum.

Education

- **BCA (Cloud & Cyber Security)** – Amity University, Noida (2023–2026) - *Online mode — completed alongside full-time industry experience*
- **Senior Secondary (12th)** – GBSS School, Delhi (2020–2021)

Key Projects

Gaurastra – E-commerce site

Next.js, Node.js, Express, PostgreSQL, Prisma, Redis, Stripe, Tailwind CSS, Python

- Split the backend into modular microservices for Product, Order, User, and Payment so each one can scale independently.
- Built idempotent payment processing using Stripe webhooks with idempotency keys — zero duplicate transactions across 5000+ orders.
- Cut API response times by 45% with Redis caching and proper TTL-based invalidation.
- Redesigned the checkout flow with optimistic UI updates, which improved conversion by 40%.
- Built a persistent cart that works across sessions — 65% of returning users recover their cart.

Freekaamaal – High Traffic Deals Platform

React.js, Next.js, Node.js, MongoDB, Socket.io, Firebase, Tailwind CSS, React Native,

- 20K+ MAU at 99.5% uptime, 2M+ daily API calls at under 80ms average response.
- Hit 96 on Lighthouse by combining Next.js SSR/SSG and adding proper JSON-LD structured data.
- Cron jobs processing 20K+ deal expirations daily with batch operations and rollback safety.
- Rate limiting and request queuing to handle flash sale traffic spikes without things catching fire.
- Python scraping pipelines to pull deal data from third-party sites.
- Real-time price tracking using Socket.io — pushes updates every 5 seconds to 2000+ active connections.

CINCH CCM Mobile – Appointment Management App

React Native, Expo, TypeScript, Redux Toolkit, Socket.io, Firebase FCM, REST API

- Built a cross-platform appointment and chat app with role-based navigation and centralized Redux state.
- Integrated Socket.io with custom reconnect logic and message queuing so chat doesn't break on flaky mobile networks.
- Wired up FCM for targeted push notifications and built multi-step forms with real-time validation.
- Used request debouncing, caching, and AsyncStorage for session persistence — works smoothly on a range of Android/iOS devices.

Woost Web – Real-time Freelancing Platform

React.js, TypeScript, Redux Toolkit, Tailwind CSS, Socket.io, REST API, JWT

- Built the complete frontend for a multi-role freelancing platform with project management, real-time messaging, and milestone tracking.
- Architected a modular component system with Redux Toolkit for global state and Socket.io for live chat/notifications.
- Reduced initial load time through route-level code splitting using React lazy and Suspense.
- Implemented JWT auth with Axios interceptors for auto token refresh and role-based route guards for freelancer/client/admin dashboards.

Achievements

- **Employee of the Year 2024** at Freekaamaal.com for technical work — optimized 15+ critical endpoints, brought API response from 450ms to 120ms.
- Scaled backend systems **handling 10K+ daily API calls at 99.9% uptime** and cut MongoDB query latency by 94% through compound indexing and schema work.
